## WORK EXPERIENCE

---

**Development Tech Lead** | September 2010 – Current

**WebLinc** – Philadelphia, PA

- Educated and skilled myself in Adobe ColdFusion and Fusebox
- Promoted to tech lead role after in-house recommendations
- Delegated and managed client assignments to meet deadlines
- Communicated weekly with clients and 3<sup>rd</sup> party companies about projects, timelines and maintenance work
- Maintained and safeguarded client servers around the clock to ensure up-time
- Directed and focused my team to accomplish tasks, organize projects and preserve morale
- Estimated project goals, hours and deadlines
- Trained new employees to utilize best practices and uphold company etiquette
- Reviewed, analyzed and pushed code changes through multiple environment stages
- Created and modified diverse e-Commerce features such as discounting, shipping and payment processing
- Organized team building exercises to unite co-workers, develop strengths and address weaknesses

**Multimedia Specialist (contractor)** | March 2010 – September 2010

**SEPTA** – Philadelphia, PA

- Educated others and myself in the content management system, Alfresco
- Revamped the data infrastructure for a more user-friendly experience
- Communicated with diverse departments for critical information pertaining to all modes of service
- Collaborated with the graphics department for detailed web imagery and design layouts
- Commenced and managed the mobile overhaul
- Debated and delivered ideas to accomplish tasks on a strict timeline
- Worked closely with the IT department to initiate and implement an advisories screen
- Strategized with Greater Philadelphia Tourism Marketing Corporation to establish a mutual online presence
- Partnered with outside transit agencies to resolve website accessibility issues
- Evaluated and proofed assorted types of web content before approval
- Researched and recommended technological advances in web development
- Debugged Alfresco obstacles and handled support calls and emails
- Wrote a user-friendly Alfresco user guide and dispatched it for all employees
- Investigated web complaints and provided quick resolution back to the customer
- Composed essential alerts and advisories

**HTML/CSS Specialist (contractor)** | December 2009 – January 2010

**Harte-Hanks** – Yardley, PA

- Communicated with separate departments to obtain specific details and maintain a steady workflow
- Participated in various conference calls to propose ideas and solutions for the overhaul
- Gained experience in the Model View Controller framework
- Redesigned and developed their new website using HTML, CSS and JavaScript

**C# Web Application Developer** | March 2009 – September 2009

**Section 9 Studios** – Warminster, PA

- Developed hand-coded websites from Photoshop files using HTML, CSS and C#
- Implemented Microsoft SQL Server, through DataTableAdapters, to retrieve information from the database
- Incorporated jQuery and the AJAX Toolkit to generate a dynamic experience
- Communicated with the lead developer to complete projects on a short timeline
- Congregated with clients to gather imperative content and explicit layout instructions
